From Amer Inst of Physics : 2000 Graduate Programs in Physics, Astronomy, and Related Fields before purchasing it in order to gage whether or not it would be worth my time, and all praised 2000 Graduate Programs in Physics, Astronomy, and Related Fields:

This comprehensive compendium provides information on nearly every US doctoral program in physics and astronomy, plus data on most major master's programmes in these fields. Information on many major Canadian programmes is also included. In addition, the Graduate Programs directory lists a substantial number of related-field departments, including materials science, electrical and nuclear engineering, meteorology, medical and chemical physics, geophysics, and oceanography. This 24th annual edition contains information valuable to students planning graduate study and faculty advisors, including each programme's research expenditures and sources of support. A number of helpful appendices make navigating the directory a simple task.
