1 of 1 people found the following review helpful. High Quality ContentBy PiarasAuthor Mayooran Senthilmani is currently working as finance director of 10 companies in the UK. He is a Chartered Global Management Accountant (ACMA, UK), holding MSc Degree in Accounting with Finance and BSc Degree in Mathematics.He is also the Award winning author of Live Your Life book, fore worded by New York Times Best Selling Author Raymond Aaron. His

intention for this book is to make a difference in the world by inspiring a generation of ambitious people to transform their passion into profit. This book doesn't just engage in accounting. It has sections on interview success and how to answer interview questions, how to think big and think positive, how to turn defeat into victory and much more. When I first started reading this book, I thought it was going to be just another dry accounting textbook. But the book evolves into something more as you read through the pages. By utilizing the information it will help you get that job that requires experience where the newbie has none. And this is the main objective of the book which is to help you get the job you desire without having the actual experience. This book is intelligent, wise and packed to the rafters with practical common sense advice. It's clear, concise and gets straight to the point and this makes for an easy and enjoyable read. I would highly recommend this insightful and informative book.

Barnack This book, written by an accomplished British accountant, is quite detailed, and essentially a mini course in basic accounting, running your own business, finding a job, and maintaining a positive outlook while climbing the ladder to achieve success. The title shortchanges what's in it, for it covers much more than getting hired without work experience. It tells what accounting is, how it works and for whom; cost control, key performance indicators, business taxes, performance analysis, human resources and payroll, accounting systems, virtual bookkeeping. Job-finding topics covered are personal contacts, the use of LinkedIn, curriculum vita writing, and how to handle interviews. In the areas of maintaining a positive outlook for success, it addresses the use of mind power and spiritual energy, learning from world leader histories, overcoming procrastination, turning defeat into victory, positive thinking, and time management.
